Ready to save almost \$1400 this year without straining your budget?!? Me too!

Every week, put what you can afford to save in your savings jar (or account) and cross off the amount below. You want to save as much as you can each week, so those tight weeks you still have get to cross off a number.

If you can save more than \$52 one week, cross off the highest number you haven't used yet, pat yourself on the back, and resist the temptation to skip next week!
